6 January 2003

Distribution: To all Licensed Plumbers and Authorized Persons

Dear Sir,

WSD Circular Letter No. 1/2003
Issue of “No-objection” Letters of Thermoplastic Pipes

We have reviewed on issue of “no-objection” letters in respect of thermoplastic pipes. At present, we require applicants to produce results of tests to BS 6920 (see footnote below), the opacity test, the pressure test and the thermal cycling test. In view that manufacturers, designers, authorized persons and licensed plumbers bear their respective responsibilities for the application of the thermoplastic pipes in fresh water plumbing systems, the production of opacity, pressure and thermal cycling test results will no longer be required for obtaining a “no-objection” letter. With immediate effect, we will issue a “no-objection” letter for thermoplastic pipes in compliance with BS 6920.

If you have any enquiry, please contact Mr. TAM Yat Hung at 2829 4449.

Yours faithfully,

(CHAU Chi Wai, David)
for Water Authority

Footnote: Suitability of non-metallic products for uses in contact with water intended for human consumption with regard to their effect on the quality of the water.
